

CRYOCUBE PROBAG

Last Mile Solutions Powered by Cryopak

The CryoCube ProBag is designed to maintain temperatures up to 12 hours, with the option to extend thermal performance up to 120 hours. Cryopak has made this product available in three different temperature ranges (2-8°C, 15-25°C & -20°C) and three different sizes (6 Cube, 10 Cube & 12 Cube). An optional Cryopak data logger (iMini Series) provides the assurance that your CryoCube ProBag performed up to industry standards. A built-in LCD screen acts as a thermometer and will always display the temperature of the shipment.

This solution is ideal for delivering temperature sensitive shipments such as blood, organs, vaccines, diagnostics, biologics, and other pharmaceutical products directly to the end user without any breaks in the cold chain process.

Small

Payload dimensions
6 x 6 x 6 inches

Empty weight
9.5 lb

External dimensions
8.5 x 8.5 x 8.5 inches

Medium

Payload dimensions
10 x 10 x 10 inches

Empty weight
22.5 lb

External dimensions
12.5 x 12.5 x 12.5 inches

Large

Payload dimensions
12 x 12 x 12 inches

Empty weight
32.5 lb

External dimensions
14.5 x 14.5 x 14.5 inches
