

# DOMETIC ICE BOXES FOR VACCINE TRANSPORT

- Think insulation and unique sealing design
- Hygienic and easy to clean
- Durable handles and carry strap
- Recommended for medicines and vaccine transport.
- Stainless steel fittings
- Data logger and validation options

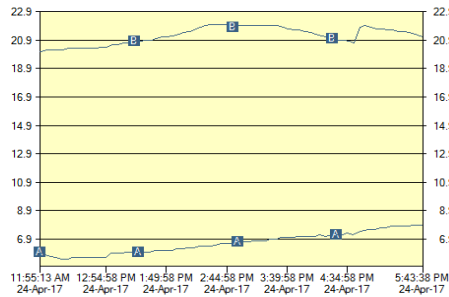

Dometic Ice Boxes are recommended for the transport of medicines and vaccines. They possess a thick, refrigeration grade foam insulation and 'Labyrinth Seal Design' feature which contributes to maintaining temperatures below 8°C for longer.

The rotomoulded design means there's no seams where heat can get in or cold can escape! The iceboxes are also extremely strong, durable and easy to clean.

13L and 22L models come with a convenient carry strap for easy transport.

Tested with Cryopak Phase 5 PCM, the ice box will maintain temperature between 5.0°C and 7.5°C for 5 hours with frequent opening (copy or report available on request).

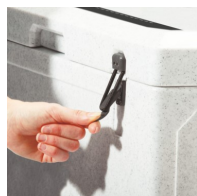

**Cryopak**  
a TCP Company

## Optional:

- LogTag TRED30-16R datalogger and probe installed
- Validation Test Report (models 13L and 22L currently)

Models		Dimensions (dxhwx)	Weight (Kg)
WCI-13	13L	386x306x241mm	2.8
WCI-22	22L	386x314x363mm	4.2
WCI-33	33L	400x360x440mm	5.7
WCI-42	42L	632x342x390mm	7.5
